

3rd German Conference on Trilobites

8th & 9th October 2016

„Trilobites – Fascinating Marine Animals from the Palaeozoic“

Invitation

The Museum für Naturkunde Berlin (Museum of Natural History) and the Fossil Collectors Group at the museum would kindly like to invite you to visit the 3rd German Conference on Trilobites in Berlin.

In terms of Citizen Sciences the main objective of the symposium is to support the exchange of ideas between palaeontologists, avocational palaeontologists, students, collectors and people with a common interest in trilobites.

It is our hope that the participants use the conference intensively to get to know each other and exchange informations on new findings. Maybe, as in the preceding conferences, this will again lead to fruitful collaborations that result in shared publications.

Michael Zwanzig

Fossil Collectors Group at
the Museum f. Naturkunde,
Kulturring in Berlin e.V.,
Kulturbund Treptow

Prof. Dr. Richard A. Fortey

will present the main lecture of the
conference, giving an overview on his
thoughts and thesis about trilobite
life habits.
